THE VALLANCE NURSERY

81 Glen Avenue, OAKLAND, CALIFORNIA

THE VALLANCE NURSERY

81 Glen Avenue (one block from 40th St. and Piedmont Avenue), Oakland, California

We are succeeding the Nursery department of C. O. Morse & Co., and are continuing the business at the old location, 81 Glen Avenue, just one block from 40th Street and Piedmont Avenue. Prospective customers and those interested in plants are invited to call and inspect our stock and consult us about planting at all times.

Our experience in planting Ornamental Grounds and Orchards, extends actively over 25 years in California.

We are glad to consult with you about your planting problems.

GREENHOUSES and SALESYARD are situated on GLEN AVENUE, off Piedmont Avenue, OAKLAND, CAL. Visitors from San Francisco can reach there by taking the new Key Route Ferry (foot of Market Street) to PIEDMONT STATION; those from Oakland, by taking the Piedmont Avenue cars on Broadway to Glen Avenue. NURSERY TELEPHONE, PIEDMONT 30.

ORDERS. Please remember that when busy season commences the Nursery is rushed with orders. It may be a few days before orders can receive attention. Rest assured that there will be no unnecessary delay in shipping.

Prices quoted herein are f. o. b. cars, Nurseries, and cancel all previous quotations.

CLAIMS. Should any errors occur we desire to be informed upon receipt of goods, in order that we may rectify them without delay. All claims must be filed within 10 days after the arrival of the shipments.

THE VALLANCE NURSERY give no warranty, express or implied, as to description, purity, productiveness, or any other matter of any plants or trees they send out, and will be in no way responsible for the crop. If the purchaser does not accept the goods on these terms they are at once to be returned.

PACKING. Sufficient money should be added to remittance to cover cost of boxing, etc.—say, 10 per cent of purchase; also, if desired by parcel post, add postage.

SUBSTITUTION. It should be stated whether and to what extent substitution will be allowed in case the order cannot be filled to the letter. Where no instructions in this respect accompany the order, we shall feel at liberty to substitute other varieties as nearly similar as possible.

GUARANTEE. We do not guarantee stock to live, nor will we replace free of cost that which dies or fails to grow. We do guarantee, however, that all Nursery stock will be in good, live and healthy condition upon departure from the Nursery.

NURSERY STOCK can go by parcel post, if customer lives too far from express office. If desired by post, please add postage.

Terms: Money can be sent by money order or personal check.

ACCEPTANCE OF ORDERS. We accept all orders on condition that same shall be void should injury befall our stock from fire, frost, floods, drouth or any other cause which could not be prevented and over which we have no control.

NEWEST ROSES

The plants we offer are two year old, field grown, and will bloom first spring after planting. We commence digging about middle of December.

IONA HERDMAN

It is clear orange-flame, the flowers are carried on good long stems, and is beautiful in bud, and when full bloom it is a continuous bloomer; the growth of plant is also ideal; the foliage is bright glossy green.

IRISH ELEGANCE

Apricot shaded coppery bronze. Single.

IRISH FIREFLAME

Old gold; flushed crimson; buds long and pointed; foliage rich and glossy; plant strong grower. A very charming rose.

ISOBEL

This lovely acquisition to the single roses will surely be welcomed by all rose lovers. It is an exquisite shade of pink flushed orange scarlet; center of flower pure rich yellow; the combination of colors cannot be adequately described, it must be seen to be fully appreciated; fragrance is charming.

JULIET

Outside of petals old gold, center rich, rosy red, changing to deep rose as the flowers expand.

JOSEPH HILL

Pink, shaded salmon, outside petals coppery pink; a most superb shade; flowers large and double. One of the best recent introductions.

LADY HILLINGDON

Blooms continuously, buds very long with a most pleasing shade of orange yellow. Particularly fine in the bud state.

LIEUTENANT CHAURE

Velvety crimson-red, large; a grand bloomer, and very fragrant.

LOS ANGELES

The originator (Fred S. Howard) describes Los Angeles as "a flame pink, toned with coral and shaded with translucent gold at the base of the petals."

LOUISE CATHERINE BRESLAU

The buds are coral-red, shaded chrome yellow, while the expanding flowers, which are very large, are shrimp-pink, shaded coppery orange.

LYON ROSE

One of the judges who awarded the gold medal to this rose says: "I have no hesitation in recommending it as the most wonderful color yet obtained among roses. This may be best compared to the intense flame color seen in a glowing coke furnace."

MADAME BUTTERFLY

Brilliant pink suffused apricot and gold; flowers carried on long stems. A very fine acquisition to our newer roses.

MADAME CHARLES LUTAUD

Large, full and globular flower, fine long bud of a nice ochre yellow, carmine tinted, carried on long flower stalks. The progeny of an unnamed variety crossed with Marquise de Sinety.

MADAME MELANIE SOUPERT

MADAME HERRIOT

"Daily Mail Rose"

Coral red, shaded yellow at base, passing to shrimp red; a very beautiful combination of colors.

MADAME SEGOND-WEBER

A highly satisfactory rose, ever-blooming and hardy. Flowers are very large, full and fragrant; a warm, deep pink—although a lighter shade of salmon-flesh in the bud form.

MARQUIS DE SINETY

Yellow flushed orange, buds pointed; open flowers cupped; fragrance rich and pronounced, a very beautiful sort.

MISS LOLITA ARMOUR

Color of this new rose is distinct from all others. The flowers are large and full, with petals of great substance and sweetly scented; as the flowers expand they develop to a deep coral red with a golden red suffusion; a vigorous grower and free bloomer.

MME. COLETTE MARTINET

A vigorous growing variety; long golden-yellow bud opening to a beautiful old-gold, shaded with orange-yellow; attractive bronzy-green foliage.

MRS. WEMYSS QUINN

Intense lemon-crome, suffused orange, which gives it a rare depth of color, which never fades out; flowers and buds ideal; long bloomer; habit of growth perfect.

MRS. AMBROSE RICCARDO

Varying in color from a deep honey-yellow with soft but glowing rosy suffusion to a soft saffron-yellow; of great size, the largest of its type. A magnificent, delightfully fragrant rose, and remarkably free-flowering.

MRS. C. W. DUNBAR BULLER

Warm deep rosy carmine; large, well formed flowers, freely and continuously produced.

MRS. WALTER EASLEA

Glowing crimson-carmine, back of petals satiny crimson; blooms large, full; imbricated form and freely produced; deliciously perfumed.

MRS. H. STEVENS

A grand pure white; buds and flowers exquisite, which are produced for a long period in great profusion. Highly commended.

General MacArthur

MRS. GEO. SHAWYER

Fukien, China, April 2nd, 1921.

I wish to send thanks for the careful packing which brought the trees here in fine condition. There were delays at Shanghai and Foochow, so that the box did not arrive here until nearly two months after the date shipped from Oakland. However, when the trees were unpacked everything was found to be in good condition.

P. H. P.

Cebu, Philippine Island, March 30th, 1921.

I am pleased to state that the roses reached me in perfect condition.

A. P. T.

Chekiang, China, May 15th, 1921.

The fruit trees and grape vines were safely received; the trees were very good and plump.

M. L. C.

San Angel, Mexico, May 16th, 1921.

I am very well satisfied with your roses which arrived in fine condition. Your plants are the best I have ever received from the United States. I congratulate you on your packing.

A. M. C.

Moji, Japan, May, 1920.

I received this morning the parcel of roses. They were 50 days in transit, and out of the 54 sent, only one was dead.

Our method of packing for foreign shipments, as is evidenced by the above letters, is of the very best, and we solicit orders from Mexico, Central America, China and Japan.

FRUIT TREES AND SMALL FRUITS

The California Cultivator (a paper devoted to horticulture in this state) submitted to us the following questions and asked us to give them an answer thereto. As they bear very greatly on fruit tree planting in California, and we receive such questions daily from intending planters, we thought we would help planters by giving the questions and our reply. We know it will be of great assistance to the novice in fruit tree planting:

1. How many months are included in the best planting period, i. e., how early may fruit trees be taken from nursery in fall and how late may they be planted?

1. Late December, January, February, and early March.

2. Where is it best to plant them, i. e., can you give a general idea as to planting figs, apples, pears, cherries, walnuts, peaches, and such other fruits? Of course, if you covered all the fruits, this would take too much time, but whatever information you can give is greatly needed by tree planters. Orchard after orchard has been set out, only to prove a failure because owners did not understand this question.

2. Figs should be set out in the warmer sections, principally the San Joaquin and Sacramento Valleys, and the other fruits mentioned can be planted from Mendocino to San Diego. The intending planter, however, must use his own judgment about the best locations for each of these fruits.

3. What age and size of tree is best?

3. The best tree to plant out is what nurserymen call "one-year-old" trees; the root is a year older, so this practically makes the trees two years old, but nurserymen style them "one-year-old;" either three to four feet high or four to six feet high.

4. How large and how deep should holes be?

4. In sedimentary land, the hole does not require to be so very large, 1½ feet square will cover it. In heavier soil two feet will be necessary.

5. Is it best to plant any deeper in well-prepared soil than tree was set in nursery?

5. Plant a little deeper than what they were in the nursery—no more than one inch.

6. Would you recommend close pruning of roots before planting or simply trimming mutilated ends? If you favor close trimming of roots, would you go to the extremes recommended in the Stringfellow method?

6. We recommend medium cutting back of the roots. We would not go to the extreme as Mr. Stringfellow does, although we practice it a great deal in our nurseries when we are lining out young stock, and have good success with it.

7. Would you top trees, i. e., take off greater portion of top grown in nursery, and if so, before or after setting? Would you do it by exact measurement the orchard over, or according to vigor of trees?

7. Trees should be pruned after planting, not before. They should be cut back about to 2½ to 3½ feet; peaches and almonds should have some of the laterals left; prune these to two or three inches from the stem; the main stem has often blind eyes; apricots, prunes, pears, apples and plums can be trimmed to single stem.

8. If irrigation water is available, would you settle dirt about the trees with water or by tamping?

8. In the drier sections it is a good idea to use irrigation to settle the soil around the roots after planting, but in the northern parts and in the Santa Clara Valley, where the rainfall is good during the months of January and February, this is not necessary. Work the soil carefully around the roots; in light soil heavier tamping can be done than in heavy, wet land.

9. Would you advise use of fertilizer or manure, either in hole or on surface, at time of planting?

9. In planting large orchards no fertilizing is done.

10. Is any advantage gained by protecting trunks of newly planted trees from rays of sun? If so, what method is best?

10. It is very necessary to protect the trunks of young trees during the first summer months, either by full tree protectors, shakes set on the sunny side, or by wrapping newspaper and tying with a cord. This keeps the tree from getting sunburnt and is certainly of great benefit to the young tree.

LITTLE ARTICLE

The months of November to April are ideal for the setting out of evergreen trees and shrubs; many homes are now made beautiful by the intelligent planting of these; they add so much to the home, and the cost is so reasonable that not a house should be without this adornment. In order to further this laudable work, we take pleasure in offering a few suggestions. The larger percentage of homes now being built are medium in size and therefore it does not require a large expenditure of money.

For the average requirements we think the following list will be found about right: The Italian Cypress or the Arizona Blue Cypress will be what you will require for pyramid shaped plants; the Abelia, a very fine variety having pinkish-white flowers in clusters; Berberis Darwini, foliage small, glossy green, flowers yellow; Coprosma, sometimes called "Mirror Plant" on account of its very glossy leaves which shine as though varnished; the Cotoneasters and Crataegus are those shrubs which bear such lovely red and orange colored berries in the fall and winter months; Diosma ("Breath of Heaven") is a lovely low growing shrub bearing small white flowers, the foliage when pressed in the fingers emits a sweet odor; the Heathers produce small bell-shaped flowers in great profusion and are much admired; Genista Racemosus belongs to the Broom family, is of rather dwarf habit, flowers in long racemes of striking yellow; the Spanish Broom is another favorite, this variety is larger growing than the preceding and has canary yellow flowers borne in great profusion during summer and fall months; Lonicera Nitida is another shrub we can recommend, it is of quick growth, and has small glossy leaves, can be trimmed like a boxwood if so desired; Pittosporum Crassifolia you will fall in love with, the underside of the leaves are sea-green in color, it bears seed pods which when ripe burst open and show the red seeds, perhaps you have noticed this shrub and wondered what it was, you should have one of these by all means; Oregon

Grape (Mahonia), lovely glossy holly-like foliage; the Pink Crepe Myrtle you very likely are acquainted with, one does not see many in this vicinity, but in valleys they are wonderful. Why not plant some Fuchsias? Your garden would not be complete without them; take the Baby Fuchsia, for instance; don't you think they are charming? The Laurustinus is also good, flowers very showy; the English Myrtle must also be remembered, leaves dart shaped, small and shiny, and when bruised emit a pleasant aromatic odor, flowers white in clusters. The different species of Veronicas are much used in beautifying of homes; the flowers are of various shades of blue, and one variety has ruby colored flowers; there are also three low growing kinds that are of dwarf habit, Cupressoides, Buxifolia and Traversii; they grow like Boxwoods, but more satisfactory, we think; if you have any little spaces on the walks to your house, use either of these.

How about a nice border? Would you care to have one? then use the Dwarf Boxwood; this never grows very high, foliage nice pleasing green. If you don't care for this then try the Santolina, foliage sage green; requires trimming about twice a year. The Sea Pink (Armeria) is good for edging and has pretty pink flowers. Feverfew (Golden Feather) of course you know, as it is much used for borders.

Would you care to have some trees on your sidewalk? If so, get neighbors together and agree upon one variety; a conglomeration of varieties on the sidewalk is heart-breaking and should not be allowed. The Black Acacia and Acacia Latifolia are ideal for this purpose; these two varieties can be trimmed to suit. Some people like the Purple Leaved Plum, very nice, and some use the Hawthorn for sidewalk, but to our way of thinking, the sidewalk is no place for it; it is all right in some place in the back garden where you can go and visit it on a nice dewy morning, when in bloom, and the sweet fragrance will carry you back to the days of your youth. Oh! don't forget the Silver Birch and Mountain Ash; they are very dear to us all.

Fuller descriptions and prices will be found on pages 5, 6 and 7 of this booklet.
